

JOB DESCRIPTION

Department:	Global Application Development
Supervisor:	Andy Lin
GBU or REGION or Function	Global IT
Duration	Beginning of June through Mid-August
Location:	Iselin, NJ

SUMMARY OF POSITION:

The Information Technology Summer Internship Program at Ansell is a strategic program that enables participants to combine their coursework experience with the skills and real world experience needed to broaden their knowledge across the IT application development spectrum.

Our internships will give you real-world hands-on experience with cutting-edge technology and valuable industrial knowledge. You'll be mentored by experienced IT professionals and get the inside view of the industry from a global leader in protection solutions. More importantly, you will enjoy and have fun!

RESPONSIBILITIES:

The candidate for this position will be responsible for creating and updating external-facing web portal for Ansell customers. Strong web-development and design skills are required. The candidate will work at the direction of a Lead Developer or other senior members with knowledge of both the organization and technology. Java or Microsoft .NET/Visual Studio and ASP skills are highly desired.

This program is an 8-12 week program and curriculum may include one or many of the following subjects:

- C#, ASP.NET and underlying .NET Framework Java Scripts, PHP, JQuery
- Windows/Linux
- GUI, HTML, CSS
- XML, Web Services (REST or SOAP)
- Java
- Project Management
- Strong Team Building Skills

REQUIREMENTS:

1. Working towards BS/BA or MS/MA degree (MS/MA preferred) in Computer Science, Computer Engineering, EE, MIS or related technical fields
2. Good communication, self-motivation and teamwork skills are a must

INTERESTED STUDENTS CAN SEND THEIR RESUME TO:

Chiao-Wei Lee
Senior Manager, IT
